PROFESSIONAL SUMMARY

Azure Integration Engineer with 2+ years of experience designing, developing, and supporting enterprise integration solutions on Microsoft Azure. Skilled in Azure Logic Apps, Azure Functions, Azure Service Bus, Azure API Management, Azure Data Factory (ADF), Azure DevOps, and ARM Templates, with hands-on experience in BizTalk modernization, event-driven integrations, data integration pipelines, and scalable cloud integration architectures.

WORK EXPERIENCE

Tech Mahindra

Software Engineer

Feb 2024 – Present

Bengaluru, India

YIT – Azure Integration Platform (iPaaS) & Cloud Integration

- Designed and implemented enterprise integration workflows using Azure Logic Apps, Service Bus, Azure Functions, and API Management to enable secure communication between business applications.
- Deployed Azure integration resources using ARM Templates through Azure DevOps YAML pipelines, validating deployment parameters and ensuring successful releases across multiple environments.
- Supported Azure Data Factory pipelines for ingesting Dynamics 365 CE data into Azure SQL Database using Copy Activities and scheduled triggers, enabling downstream recommendation and reporting workflows.
- Optimised Azure Function execution time from 30ms to under 8ms (4× improvement) through asynchronous programming, profiling, and workflow optimisation.

A Leading Nordic Security Services Provider – Azure Integration & BizTalk Migration

- Led end-to-end BizTalk → Azure migration, re-architecting legacy workflows onto Logic Apps and Service Bus, eliminating on-premise infrastructure overhead and improving scalability.
- Designed and built partner integrations using Azure Logic Apps, Service Bus, and API Management with secure policies, throttling, and role-based access control.
- Automated backend processes with Azure Functions, reducing manual operational effort by 35% and enabling event-driven, hands-off execution.
- Implemented API governance — onboarding, rate-limiting, and security policies — through Azure API Management, ensuring compliance with partner SLAs.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript
- **Backend / Frameworks:** .NET Core, ASP.NET Core Web API, MVC Architecture
- **Azure Integration:** Logic Apps, Azure Functions, Service Bus, Event Grid, Azure Data Factory(ADF), API Management(APIM), Azure DevOps, ARM Templates
- **API&Messaging :** REST API, Web hooks, API Security, API Governance
- **Data & Storage:** Azure SQL Database, SQL Server, Azure Key Vault, Cosmos DB, Azure Blob Storage, Azure Data Lake Storage Gen2
- **DevOps & Tools:** Azure DevOps, ARM Templates, Visual Studio, Git, Postman, VS Code, Azure Portal

Key Achievements

- **BizTalk → Azure Migration:** Successfully migrated legacy enterprise workflows to Azure, reducing infrastructure dependency and improving maintainability for a leading Nordic security firm.
- **35% Automation Uplift:** Replaced manual backend processes with Azure Functions-driven automation, freeing engineering bandwidth for higher-value work.
- **API Governance at Scale:** Managed secure partner API onboarding, throttling, and access control via Azure API Management across multiple enterprise clients.
- **Event-Driven Architecture:** Designed and delivered event-driven integration pipelines using Service Bus and Logic Apps for logistics and security domains.

CERTIFICATIONS

- Azure Integration L1 V1 - Tech Mahindra Internal Certification
- Azure AI Fundamentals (AI-900) - Microsoft

EDUCATION

- **B.Tech – Computer Science & Engineering**, Sri Venkateswara College of Engineering and Technology, Chittoor — CGPA: 7.52 — Dec 2020 – May 2023
